RESEARCH INTERESTS

My research is interdisciplinary, problem-oriented, and involves a range of experimental and simulation methods. During my doctoral studies, I have combined deep learning, direct stochastic optical reconstruction microscopy, and Langevin dynamics simulations to study phase separation of nucleosome nanodomains. Deep image models enable fast diffraction-unlimited super-resolution microscopy and a dynamic view of the epigenetic landscape in a living cell. These measurements also provide a valuable context for molecular dynamics simulations and Fourier analysis of nucleosome vibrations.

EDUCATION

Doctor of Philosophy, Physics
Purdue University, Indianapolis, IN, 2024
Thesis: *Visualizing nucleosome cluster dynamics with direct stochastic reconstruction microscopy*

Master of Science, Biophysics
University of Chicago, Chicago, IL, 2021
Thesis: *Stable cell assembly formation in excitatory-inhibitory neuronal networks*

Bachelor of Science, Magna Cum Laude, Physics
Purdue University, Indianapolis, IN, 2019
Minor: Mathematics

Bachelor of Science, Magna Cum Laude, Informatics
Luddy School of Informatics, Computing, and Engineering, Indiana University Bloomington, 2019
Concentration: Mathematics

SOFTWARE SKILLS

Python, PyTorch, C/C++, Git, LaTeX, Bash, Linux

EXPERIENCE

Research Assistant 2019-2021
Indiana University - Purdue University, Indianapolis, IN

- Develop an image processing software pipeline for high-throughput quantification of images in fluorescence microscopy
- Utilize high performance computing clusters for image segmentation, single particle tracking, and image registration

Undergraduate Research Assistant 2019-2020
Indiana University - Purdue University, Indianapolis, IN

- Utilize time-correlated single photon counting (TCSPC) to characterize the sub-Poissonian emission of organic quantum dots dispersed in a thin film of poly-methyl methacrylate (PMMA)
- Design and utilize a 3-color imaging protocol to perform single-molecule imaging of mRNA transcripts in human epithelial kidney and osteosarcoma cells

Undergraduate Tutor 2018-2019
 Indiana University - Purdue University, Indianapolis, IN

- Tutored undergraduate students in introductory physics courses covering classical mechanics, classical electromagnetism, circuit analysis, and modern physics

AWARDS

NIH Graduate Training Fellowship 2020
 University of Chicago, Chicago, IL

Travel Award and Lightning Talk Invitation 2019
 Physical Sciences in Oncology - Minneapolis, MN

Hudson and Holland Scholarship for Diversity and Inclusion 2013-2017
 Indiana University, Bloomington, IN

Founders Scholar 2013-2017
 Indiana University, Bloomington, IN

Digital Scholarship 2016-2017
 Indiana University, Bloomington, IN
