## PERSONAL STATEMENT

I specialize in the application of probabilistic models, particularly deep generative models, to biological discovery and computer vision. I have primarily applied these frameworks to advancing super-resolution fluorescence microscopy of so-called nucleosome nanodomains, and have published on this topic in high-impact scientific journals.

## EDUCATION

### Doctor of Philosophy, Physics

Indiana University, Indianapolis, IN

Thesis: *Advancing super-resolution microscopy for quantitative in-vivo imaging of chromatin nanodomains*

### Master of Science, Biophysics

University of Chicago, Chicago, IL, 2021

Thesis: *Stable cell assembly formation in excitatory-inhibitory neural networks*

### Bachelor of Science, Physics, Magna cum laude

Indiana University, Indianapolis, IN, 2019

Minor: Mathematics

### Bachelor of Science, Informatics, Magna cum laude

Luddy School of Informatics, Computing, and Engineering, Indiana University Bloomington, 2019

Concentration: Mathematics

## RESEARCH EXPERIENCE

### Graduate Research Assistant

2022-Present

Indiana University, Indianapolis, IN

- Design deep generative models for enhancing super-resolution fluorescence microscopy
- Implement direct stochastic optical reconstruction microscopy (dSTORM) for super-resolution imaging of chromatin in living cell nuclei
- Investigate the impact of mutations in epigenetic proteins on chromatin structure in living cell nuclei experimentally and complement experimental data with molecular dynamics simulations

### Graduate Trainee

2020-2022

University of Chicago, Chicago, IL

- Utilize fluorescence microscopy to measure temporal dynamics of calcium concentration in single cells
- Generate Monte Carlo simulations of spiking neural networks to relate network architecture to spiking dynamics

### Undergraduate Research Assistant

2019-2020

Indiana University, Indianapolis, IN

- Develop an image processing package in Python for processing large volumes of images generated by fluorescence microscopy

- Utilize time-correlated single photon counting (TCSPC) to characterize the sub-Poissonian emission of organic quantum dots dispersed in a thin film of poly-methyl methacrylate (PMMA)

AWARDS	NIH Graduate Training Fellowship University of Chicago, Chicago, IL	2020
	Travel Award and Lightning Talk Invitation Physical Sciences in Oncology - Minneapolis, MN	2019
	Hudson and Holland Scholarship for Diversity and Inclusion Indiana University, Bloomington, IN	2013-2017
	Founders Scholar Indiana University, Bloomington, IN	2013-2017
	Cigital Scholarship Indiana University, Bloomington, IN	2016-2017
