SUMMARY

Aspiring machine learning engineer in pharma or biotech. As a physicist, I am entering into this space having relevant background in Bayesian statistics, optimization, variational inference, information theory, and stochastic processes. I am also quite familiar with deep learning and modern deep learning frameworks. During my academic training, I have brought mathematical and statistical knowledge, learned in physics and computer science, to biology. In brief, I have used the above frameworks to study (i) cytokine-induced transcriptional memory and transcriptional dynamics in mammalian cells and (i) the relationship between structure and dynamics in neural microcircuits. I also have experience building specialized fluorescence microscopes for high-throughput imaging, which has led to a general interest in high-content screens of the tumor microenvironment during cancer immunotherapy. In the future, I envision that I will work as a project lead for a machine learning group focusing on drug discovery.

EDUCATION

Doctor of Philosopy, Physics
Purdue University, West Lafeyette, IN, 2024
Thesis: *Untitled*

Master of Science, Biophysics
University of Chicago, Chicago, IL, 2021
Thesis: *Stable cell assembly formation in excitatory-inhibitory neuronal networks*

Bachelor of Science, Magna Cum Laude, Physics
Purdue University, Indianapolis, IN, 2019
Minor: Mathematics

Bachelor of Science, Magna Cum Laude, Informatics
Luddy School of Informatics, Computing, and Engineering, Indiana University Bloomington, 2019
Concentration: Mathematics

COMPUTER SKILLS

Languages & Software: Python, R, PyTorch, C, Git, LaTeX, Bash, Linux

EXPERIENCE

Research Technician   2019-2021
Indiana University - Purdue University, Indianapolis, IN
- Develop an image processing software pipeline for high-throughput quantification of images in fluorescence microscopy
- Utilize high performance computing clusters for image segmentation, single particle tracking, and image registration

Undergraduate Researcher   2019-2020
Indiana University - Purdue University, Indianapolis, IN
- Utilize time-correlated single photon counting (TCSPC) to characterize the sub-Poissonian emission of organic quantum dots dispersed in a thin film of poly-methyl methacrylate (PMMA)

- Design and utilize a 3-color imaging protocol to perform single-molecule imaging of mRNA transcripts in human epithelial kidney and osteosarcoma cells

Undergraduate Tutor 2018-2019
Indiana University - Purdue University, Indianapolis, IN
- Tutored undergraduate students in introductory physics courses covering classical mechanics, classical electromagnetism, circuit analysis, and modern physics

AWARDS

NIH Graduate Training Fellowship 2020
University of Chicago, Chicago, IL

PS-ON Annual Investigator Meeting Travel Award 2019
Indiana University - Purdue University, Indianapolis, IN

Hudson and Holland Scholarship for Diversity and Inclusion 2013-2017
Indiana University, Bloomington, IN

Founders Scholar 2013-2017
Indiana University, Bloomington, IN

Cigital Scholarship 2016-2017
Indiana University, Bloomington, IN
